

# CSSP SPONSORSHIP PROGRAM

The Council of Scientific Society Presidents offers several unique sponsorship programs for their workshops (May and December of each year). There are several advantages to companies for these sponsorships.

- Association with science leaders across a very broad spectrum (many major scientific societies are participatory, ranging from American Chemical Society to Soil and Crop Science Society of America in their breadth). Scientific Society Presidents represent more than 100,000 US scientists.
  - **Bronze Sponsorship (beginning at \$500)**  
Recognition in workshop agenda (print only).
  - **Silver Sponsorship (beginning at \$2,500)**  
Recognition in workshop agenda and at workshops and during breaks (print and website).
  - **Gold Sponsorship (beginning at \$10,000)**  
One workshop registration and recognition in workshop agenda and at workshop and during breaks (print and website).
  - **Platinum Sponsorship (beginning at \$20,000)**  
Two workshop registrations and recognition in workshop agenda and at workshop and during breaks (print and website).
- Sponsorship recognition on agenda, on website and hard copy at workshop.
- Through workshop attendance — reach leadership of many diverse societies at a single event in order to share the needs of your company. Discipline breadth is unique to this workshop.
- Be aware of disruptive technology that may be advantageous to your company.
- Raise awareness of support of science.

Past sponsors who have participated in workshops have found great value in contacts made and have adjusted their overall program(s) based on ideas captured at the workshop.

Relationships developed at CSSP have led to major investments in interdisciplinary programs at universities. One example is Raman spectroscopy as a tool in sensors to detect issues in food production systems at Texas A&M.
